

LIST OF ACCEPTABLE ALTERNATIVE STANDARDS TO ISO 9001/9002:1994

IRCA has determined that, for the purposes of compliance with the QMS auditor certification criteria, the standards referred to in this document, are considered to be acceptable alternatives to BS EN ISO 9001 & 9002:1994 Standards.

IRCA's evaluation of these standards consisted of a technical review for the purposes of validation of acceptability of an applicant's claim of experience "equivalent" to auditing to ISO 9001 or 9002. This evaluation is used only to determine whether audit experience using these standards meets the audit experience requirements stipulated in the IRCA auditor certification criteria. It is not intended as a technical review of the equivalence of a standard to ISO 9001 or 9002.

IRCA will update and reissue this list periodically.
