Dear Colleague,

SBAC Annual Quality Conference 2005

The very nature of today's aerospace industry demands that platforms, products and components are produced to the very highest levels of operational effectiveness, quality and reliability - all at competitive cost.

The expectation of the customer community is such that they not only expect the products to be designed and manufactured at a cost affordable to the end consumer, but it is a given that they are delivered on time and to ever increasing levels of Quality Performance.

It is no longer just a wish of the customer for 95% or better levels of quality, but for the industry to strive to six-sigma levels, which are essential if we are to maintain a viable UK aerospace industrial base in 10 and 20 years. Quality must be at the heart of the aerospace design, build, manufacture and support environments and processes.

SBAC's 5th annual quality conference will focus on the 'Increasing Expectation' of the global industry in terms of Product Performance requirements, International Quality System and Special Process Approvals, plus the views of both the Civil and Military authorities in the UK. In all the day is designed to ensure that Quality Professionals from both SBAC and non-SBAC organisations are fully updated with the essential information they need to assure success.

Conference Details

Date: 9th November 2005

Venue: Milton Hill House, Milton Hill, Steventon, Oxfordshire OX13 6AF

Cost: £100 plus VAT members, £200 plus VAT non-members

To register please send back the attached reply form to Gen Richards, either by fax on 020 7227 1003 or by email to gen.richards@sbac.co.uk
